

feature	importance
temperature	35
wing length	33
log(labrum length)	27
ratio of wing length to wing width	27
log(crops cover)	24
log(tree cover)	23
number of lateral teeth	22
temperature range	21
log(wind speed)	21
Psathyromyia genus	20
forest land integrity index	18
log(number of cibarium teeth)	18
global human modification	17
spiculate structure of hypopharyngeal teeth	17
semi domestic	16
log(grass cover)	15
log(rainfall)	15
Trichophoromyia genus	14
main habitat: marginal areas	13
canopy height	13
